Re: Fire Hydrant Maintenance

To Whom it may concern,

R&M Service Solutions LLC, had performed Fire Hydrant Maintenance throughout Spring Lakes Improvement District distribution system. Throughout the service R&M has some observations of fire hydrants that struggled with regular maintenance. It is to our best of knowledge that no to minimal maintenance was performed on fire hydrants within the District.

R&M strongly advises to perform fire hydrant maintenance on the entire distribution system every year and 50% of the valves every year to ensure a safe and reliable water source.

Thank you for choosing R&M Service Solutions to assist within your district.
