

MANAGERS UPDATE

December 1, 2020

UPDATED PICTURES: We will be taking both individual and group pictures at the Board Luncheon after our meeting.

SRF: Corbett and our staff will begin getting organized for the upcoming water projects with this newest loan. The official paperwork for the Board to approve should be here for the January meeting.

SUPERVISORS GUIDE: There were many pages that needed revisions and updates, and it was just easier to make new sets for each of you. If you would bring your notebooks to the meeting, we can change the cover and exchange the pages.

WINTER PROJECTS: Reminder from last month. It is that time of year again when we start to develop projects and activities for our staff as lot mowing and regular mowing slows down. As in the past, if there are some things you noticed that need attention, please let me know. Some of you have already given me some items such as: re-painting the entrance signs; clean up the park picnic tables; more trash cans in the parks; and trim trees in medians. I will compile a master list and review with Randy. This process worked very well last year, and a lot was accomplished.

LEGAL UPDATE: As approved by the Board I met with a local Attorney to discuss the Airport situation. Bill Nielander will discuss the next steps.

PRIORITY PROJECTS UPDATE: It is time to develop our priorities for the next three-year period, 2021 thru 2024. We will discuss a few options at the Board meeting to streamline this task.

DELCOM FAST LITE INTERNET: A briefing was held in the office on 12/1 regarding the exploratory efforts of this company to install infrastructure for high speed internet. Century Link has not been very cooperative at all, so it is our hope that this company continues to have a favorable reaction to our community.
